Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users.  $\wp$ 

1 Phases  High-level steps your user needs to accomplish from start to finish	Create a User Account	Entering User details	Uploading images (spiral or wave)	Checking reports
2 Steps  Detailed actions your user has to perform	User enter the mailid and phone number to create a account to the website	Enter Customer/ Patient details (Doctor name, history)	Draw spiral and wave form drawings and upload them to the website	Check the report results
3 Feelings What your user might be thinking and feeling at the moment	Easy to draw and upload the images	Stage of the disease can be easily identified	Helps in early and easy detection of the disease	Periodcally patients can take the test and analyze about the results
	Is the website secure to	Can all the	User need the	User need the
